PROFESSIONAL PROFILE

Frontend Developer focused on creating intuitive and high-performance digital experiences. With a strong eye for detail and a commitment to clean and modular code, I specialize in building scalable applications using modern ecosystems like React.

EXPERIENCE

Founder & Developer

Mar 2026 - Present

Linkitly

React TypeScript Material UI Framers Motion Supabase

- Development of a SaaS platform (currently in final launch phase) for independent professionals and small to medium-sized businesses focused on sales and communication via WhatsApp.
- Design and development of modern and responsive interfaces using React, TypeScript, and Material UI.
- Implementation of administrative dashboard, calendar, client management, and availability configuration.
- Development of subscription system, plan limits, and onboarding experience.
- Implementation of internationalization (ES/EN) and SEO optimization.
- Integration with services for payments, authentication, and messaging.
- Definition of user experience and frontend architecture.

PERSONAL PROJECTS

Dec 2023 - Apr 2024

- Continuous development of web applications focused on frontend architecture, user experience, data management, and digital product construction.
- Design and development of administrative dashboards with metrics, analytics, and interactive tables.
- Implementation of complex interfaces using React, TypeScript, and Material UI.
- Development of drag-and-drop functionalities for calendars and productivity tools.
- Integration with REST APIs, Firebase, and mock servers for data management.
- Creation of interactive experiences with advanced animations and dynamic visualizations.
- Development of e-commerce applications with authentication, user management, and order processing.

FEATURED PROJECTS

Nexo
